

COMPASS FOR CUBS

A compass has a moving needle, one end points to the NORTH (**N**) the other end points to the SOUTH (**S**). These are the two main points. Between the two main points we have EAST (**E**) on the right and WEST (**W**) on the left. N E S W are the first four points to learn.

Between the main points are other points. The one between N & E is known as NORTH EAST (**NE**). Between S & E we find SOUTH EAST (**SE**). There is also the other side NORTH WEST (**NW**) and SOUTH WEST (**SW**)

To Remember

Never **E**at **S**ilk **W**orms
